

CYBERCRIME CASE STUDY: PHISHING ATTACK

IN THIS CASE, A STUDENT RECEIVED AN EMAIL THAT APPEARED TO BE FROM A BANK ASKING TO VERIFY ACCOUNT DETAILS. THE EMAIL LOOKED REAL AND INCLUDED A LINK. WITHOUT CHECKING PROPERLY, THE STUDENT CLICKED THE LINK AND ENTERED PERSONAL INFORMATION.

LATER, IT WAS FOUND THAT IT WAS A PHISHING ATTACK AND THE INFORMATION WAS MISUSED. THIS HAPPENED BECAUSE THE STUDENT TRUSTED THE EMAIL WITHOUT VERIFYING THE SOURCE.

THE MAIN MISTAKE WAS LACK OF AWARENESS AND CARELESSNESS. THE STUDENT DID NOT CHECK THE SENDER OR THE LINK BEFORE SHARING DETAILS.

THIS COULD HAVE BEEN PREVENTED BY AVOIDING UNKNOWN LINKS, VERIFYING EMAILS, AND NOT SHARING PERSONAL INFORMATION ONLINE.
